Company Profile

Our
Philosophy & Comitment

Meaningful Relationships

Throughout our business operations over the years, it has been highly important for us to create meaningful relationships with our customers and partners. It is not only about integrating creative technology services and solutions, but fostering real value into these offerings is what matters when joining our customers into developing their **digital transformation journeys.**

Since 2014

Since 2014, we have specialized in the development of Products and Solutions that serve the digital transformation and satisfy our customers' needs and since then we have been committed to **continuous Product Development and Enhancement** and deliver distinctive services that strengthen our customers' business experience.

Today

Today, **more than 150 customers** in countries trust 3Pillars teams to deliver services and solutions to overcome business challenges and step into a new age of technology transformation.

Three Pillars
Group of Companies

OUR
Vision

To accelerate our reach to serve customers across the globe to consistently capitalize on their business information and **build better digital realities**

OUR
Mission

To deliver **smooth IT Transformation Experiences** to our customers empowered by professional teams that hold competent skills, knowledge and commitment that drive valuable utilization of business information
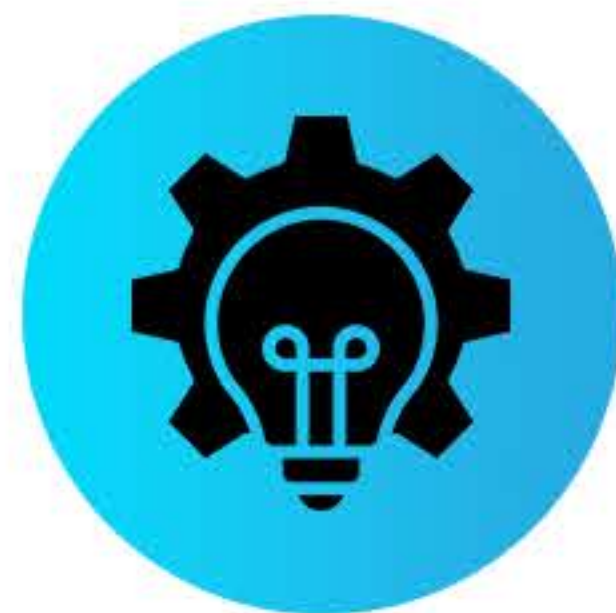

Our Values

People
It takes an amazing team to lead the journey towards a remarkable future. We believe in those who synchronize the magical powers of technology, they're not just technical experts. They're real business wizards.

Innovative
The Ability to innovate is not just a skill, it is an inherent mindset to challenge controls and limitations. We innovate to BreakThrough.
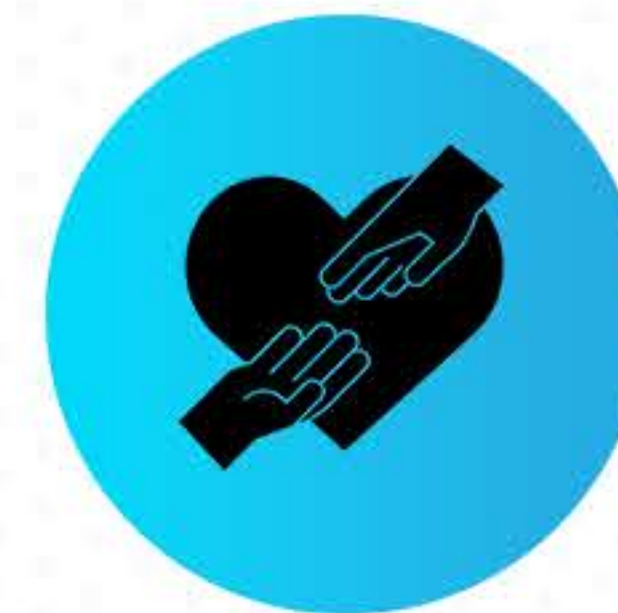

Commitment
We keep our promise to deliver exceptional customer experience.

Excellence
We set our standards high and we put our full efforts and force to excel beyond expectations.

Respect
Respect to each other is what holds our community together.

Trust
Our teams' skills, expertise and dedication build integral trust towards our services and solutions.

Technology partners

Navigating tech's rapid pace, our partnerships fuel customer success by delivering tailored solutions, driving business growth, and fostering innovation.

WSO2

WSO2 API Manager 4.1 - Main highlights

Complete Platform for building and managing APIs

- ☐ Design and implement managed APIs
- ☐ Build Integration Services from ground-up and expose as managed APIs
- ☐ Variety of options for building integration services and manage as APIs in API Manager 4.0.0.
  - ☑ Micro Integrator (Synapse) - auto discoverable by service catalogue
  - ☑ Java or any other framework, language based services can connect via service catalogue
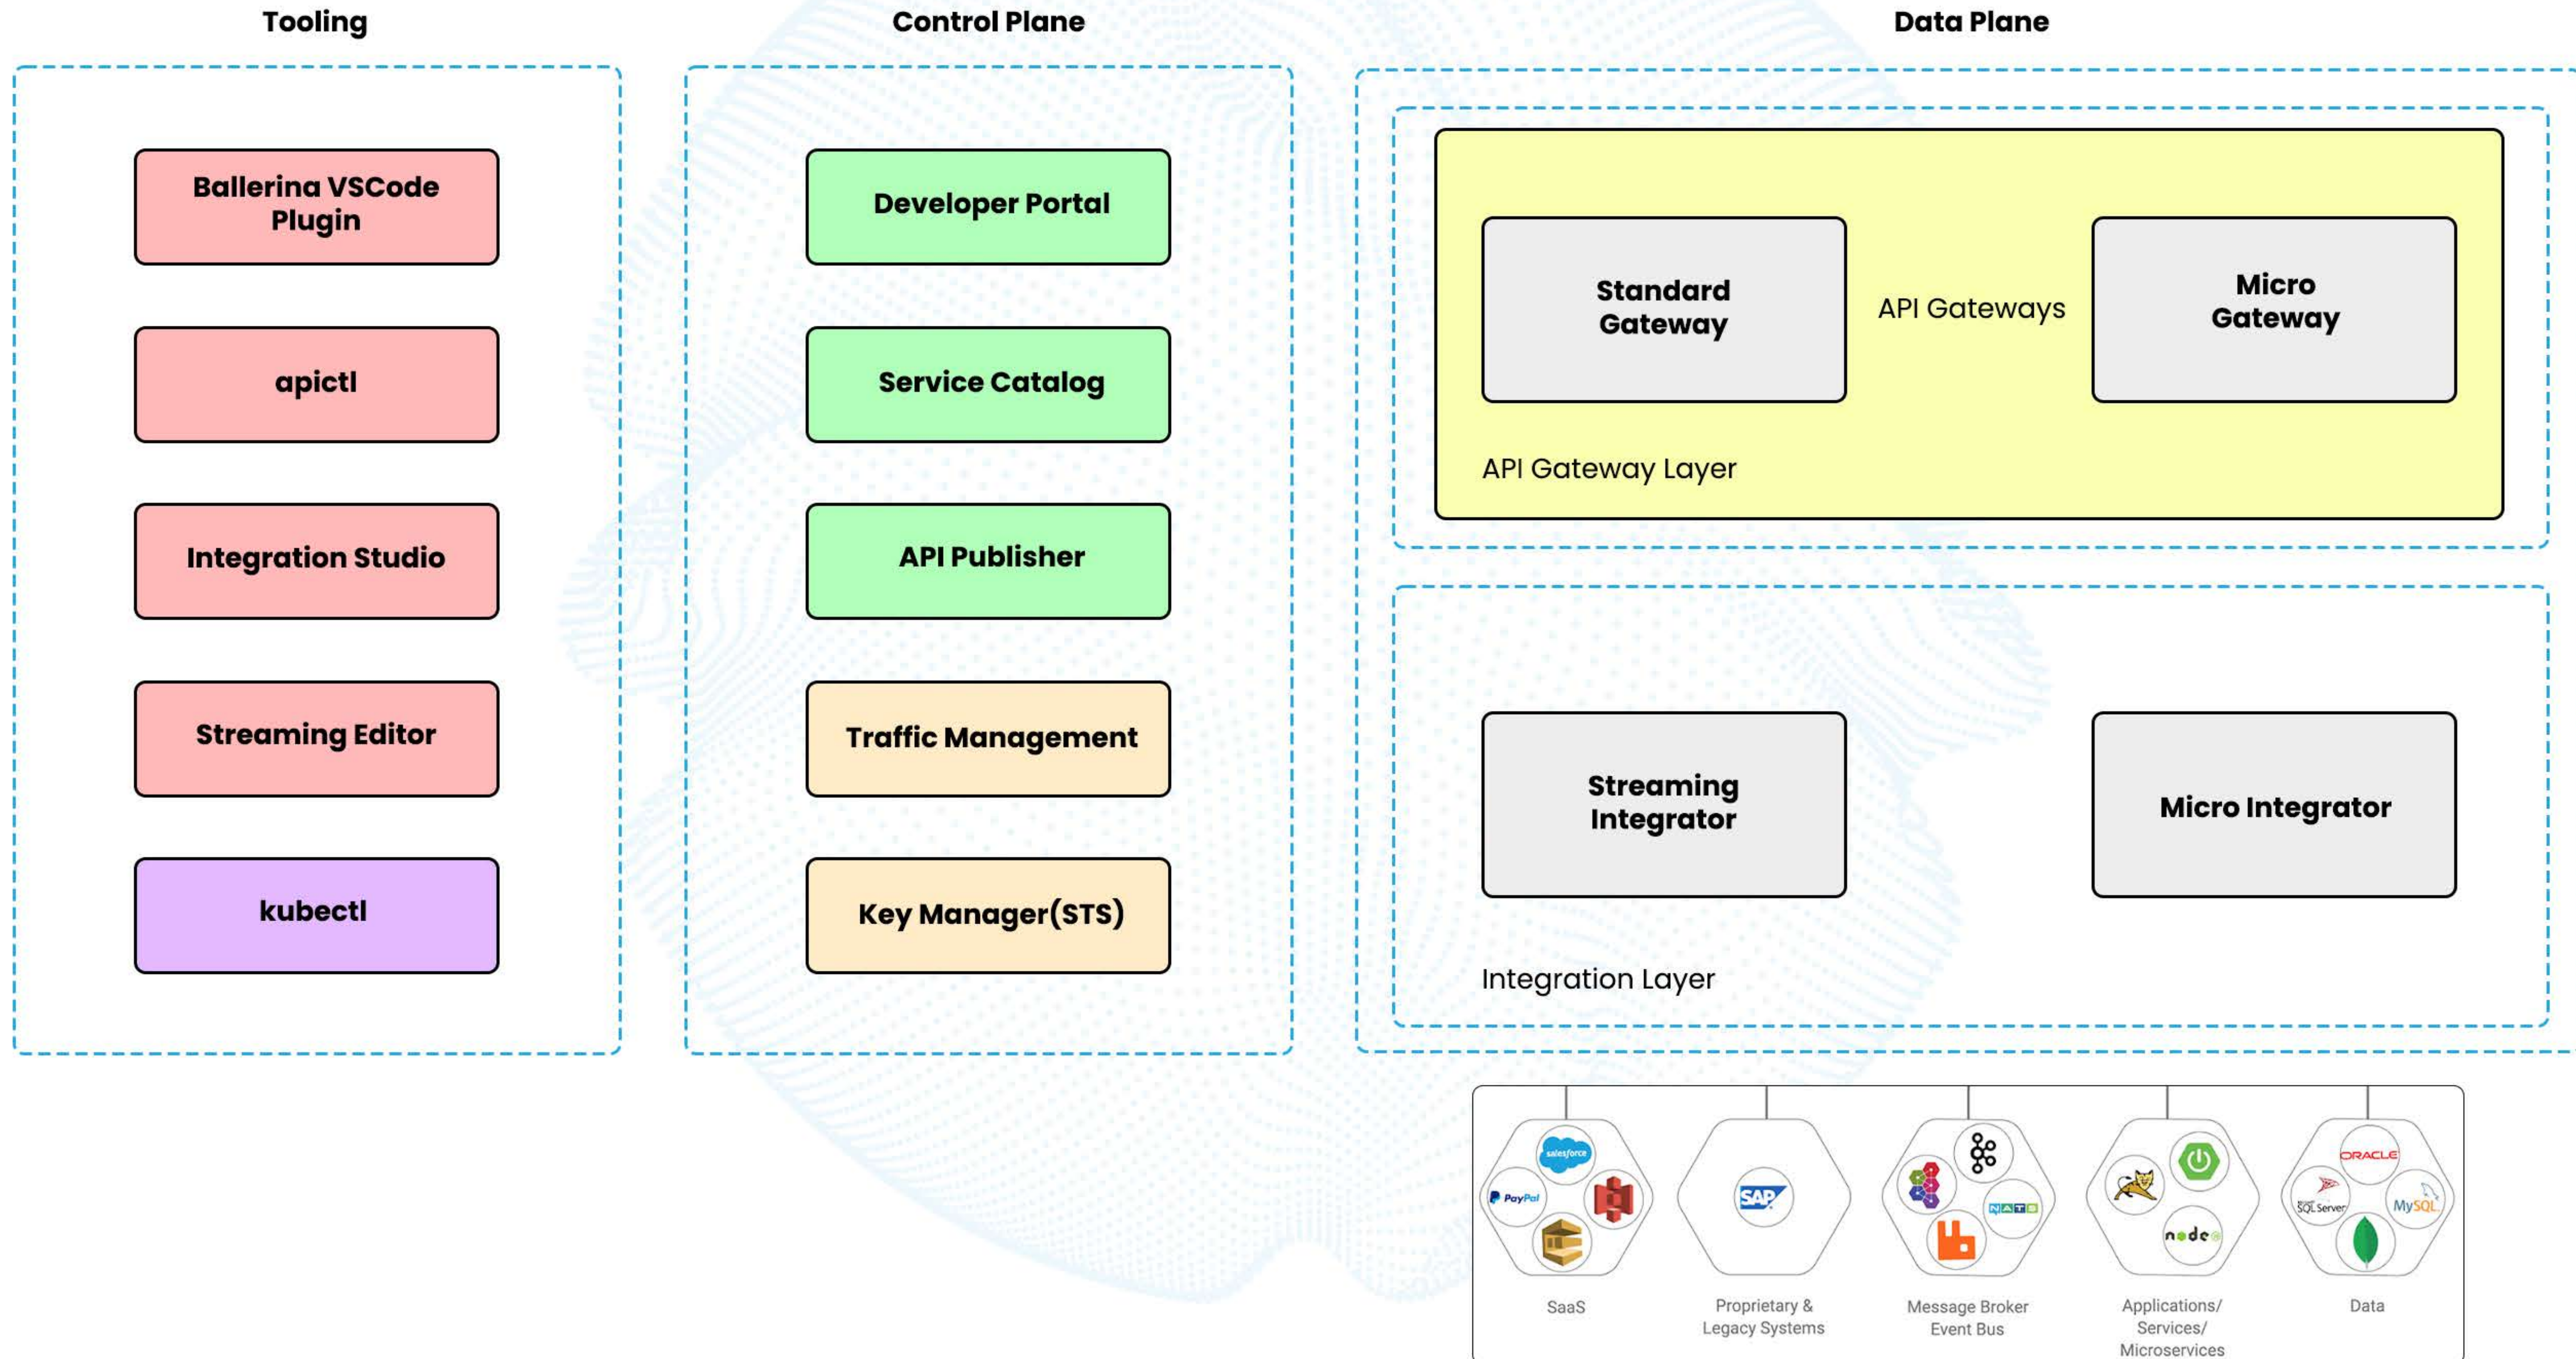

Platform for integrating Streaming APIs

- ☐ Gateways optimized for different deployment environments

Build Streaming Integrations and expose as Async APIs

- ☐ API Microgateway as the default choice in K8s
- ☐ API Gateway for On-prem VM based deployments

Virtual Interactive Event

ZINAD IT proposes a virtual full-day event via our security awareness platform that allows users to interact with each other covering the below activities:

- ☐ Security Awareness **Interactive Games**
- ☐ Security Awareness **Workshops**
- ☐ Security Awareness **Animated Videos**

Awareness Games:

ZINAD offers security awareness learning games that improve the efficiency of skills transfer, increase knowledge retention, and better captures enterprise knowledge as this games bypass boredom and poor traditional training methodologies.
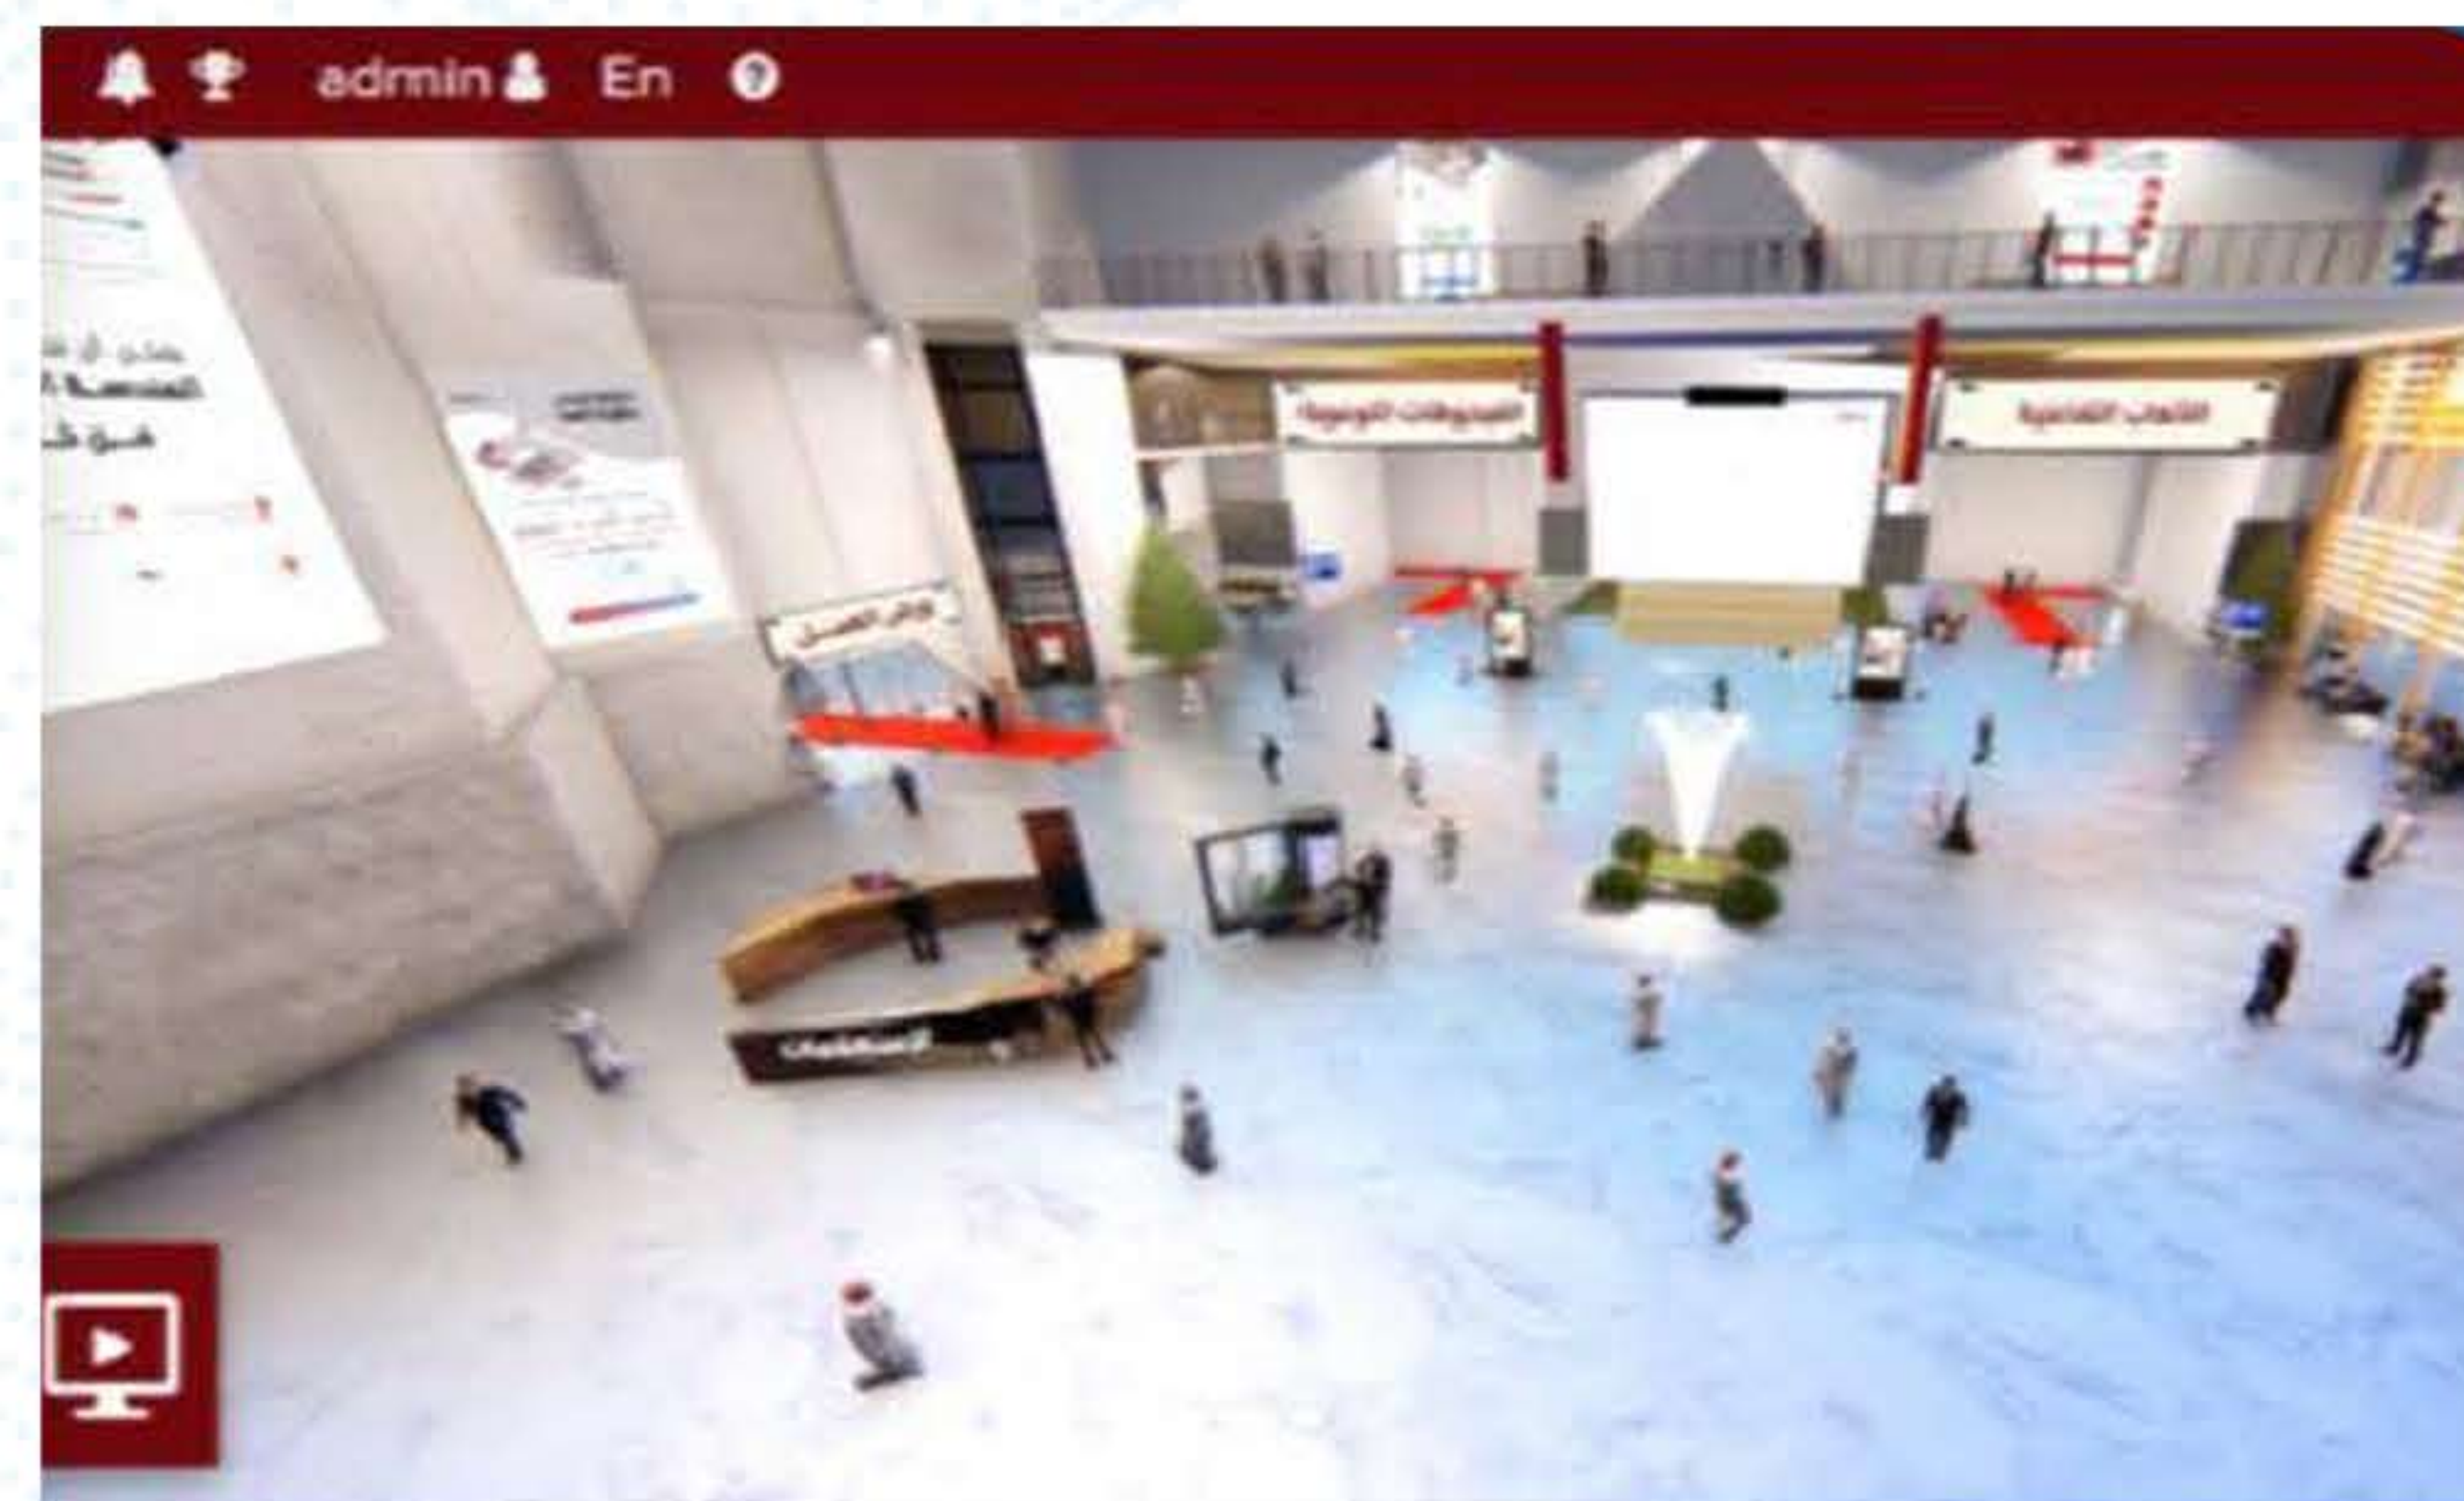

ZISOFT Awareness Management **System**

☐ **ZiSoft** is a Campaign-based Awareness Management system that works accordingly with each planned awareness campaign. ZiSoft Awareness Management allows Administrators to create campaigns for a certain department to cover specific topics, the campaigns must be planned and organized by a security campaign manager according to the awareness plan. Strategy & Roadmap development.

ZiSoft has an additional module that extend its functionality:

☐ **CSS Specialized Technical Cybersecurity Awareness module:** it targets the technical teams with a different set of technical challenges to increase their awareness level.

☐ **Virtual interactive Event:** A platform that enables you to host virtual workshops in it or to add some gamification to the platform
